Can I use VPN or Skype?

In order to make effective use of bandwidth and to provide you with the best possible internet speed that our satellite can provide, Remote Desktop, VPN (Virtual Private Networks) and VOIP (Voice-over IP) have been disabled.

Is it high-speed?

The internet is quick for a satellite connection, however, it will never be as fast as a home connection. If you feel that it's too slow one particular time, log off and try again later.

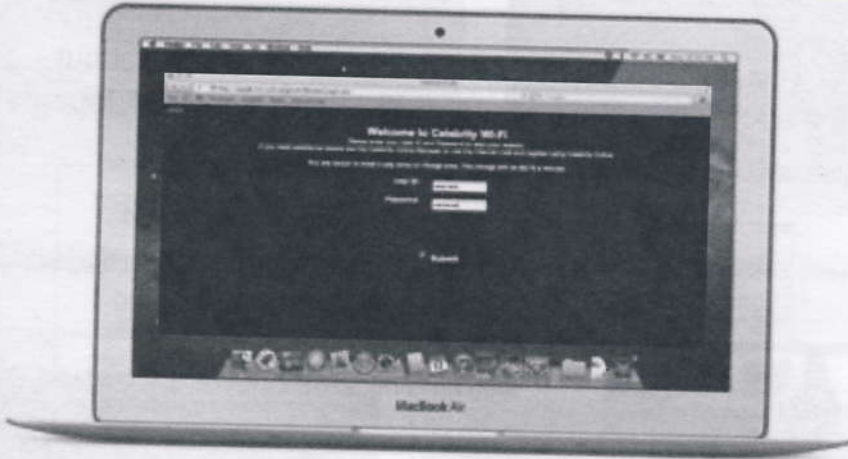

MacBooks®, iPods®, and the latest accessories. Cool.

Wireless is everywhere.

USING YOUR WiFi DEVICE
