Helpful Health Information

Medical experts tell us that the best way to prevent colds, flu or gastrointestinal illnesses – such as a Norovirus that can be transferred easily through person-to-person contact – is to simply wash your hands thoroughly with soap and warm water after toilet breaks and again before eating anything. According to the U.S. Centers for Disease Control and Prevention and Public Health Agencies around the world, Norovirus affect millions on land each year. In fact, the only illness that is more prevalent is the common cold. Symptoms of Norovirus include an upset stomach, vomiting and diarrhea. Should you experience any symptoms of gastrointestinal illness, you must visit the ship's medical facility for a complementary consultation and treatment if necessary.
