Customer Advisory

United States Public Health and Center for Disease Control Regulation Information- Animal food such as beef, eggs, fish, lamb, milk, pork, poultry or shellfish that is raw or undercooked significantly increases risk to vulnerable and immune deficient guests.

Helpful Health Information

With seasonal viruses appearing in the United States, Europe and around the world, Royal Caribbean International, working in conjunction with the Centers for Disease Control, has instituted enhanced cleaning procedures onboard all its ships. You will likely see some of these activities during your cruise vacation. Medical experts strongly suggest travelers pay close attention to washing their hands. The experts tell us that the best way to prevent colds, flu and gastrointestinal illnesses is to simply wash your hands thoroughly with soap and hot water after bathroom breaks and again before eating anything. Your cooperation and assistance with this matter would be greatly appreciated.

Our Environmental Policy goes Above and Beyond Compliance for International and National Regulations and we need YOUR help! When you leave your stateroom please remember to turn off all lights & electrical appliances. We practice the three R's: Reduce Reuse and Recycle. By following this simple request you too can help the ship reduce environmental impacts.
